**KANSAS JUDICIAL BRANCH
NOTICE OF EMPLOYMENT OPPORTUNITY**

Date: June 10, 2020

Location of Employment: **Office of Judicial Administration**
Kansas Judicial Center
301 W. 10th St.
Topeka, KS 66612

Job Title and Pay Grade: **Network Security Engineer**
Grade 44
\$60,443-\$66,668, starting annual salary

The Network Security Engineer works to secure the Kansas Judicial Branch's network infrastructure by configuring, testing, and optimizing networks and implements solutions to improve overall information security. This position is distinguished from other information technology positions by the responsibility of providing technical leadership of security initiatives.

Job Duties:

- Installing, administering, and troubleshooting network security solutions.
- Updating software with the latest security patches and ensuring the proper defenses are present for each network resource.
- Performing vulnerability and penetration tests, identifying, defending against and remediating threats, and developing disaster recovery plans.
- Configuring security systems, analyzing security requirements, and recommending improvements.
- Monitoring network traffic for suspicious behavior.
- Creating network policies and authorization roles and defending against unauthorized access, modifications, and destruction.
- Work collaboratively with the Director of Information Systems in designing and implementing all security-related functions for the judicial network. This includes backup systems and procedures and disaster recovery plans and tests.
- Training staff to understand and use security protocols.
- Work on assigned projects related to IT systems.
- Provides support to other IS teams.
- This position shares responsibilities with the Manger of Network Services in a variety of different areas, including but not limited to firewalls, routers, switches, video applications, wireless QoS, proxy, VPNs and access control systems.
- Acts as a resource to judicial staff and when working with other state agencies and/or other organizational units.
- Responsible for one's own work product and may provide guidance, assistance, or mentorship to less knowledgeable or experienced coworkers. This may include scheduling of work, instructing in work methods, and reviewing work products.

Required Education and Experience:

A bachelor's degree from an accredited college or university in computer science or a related field and four or more years' experience directly working with Cisco firewalls is required. At least one of these security certifications is required: CCNP, CISSP, SSCP, CEH, GIAC, Security +, OSCP, CCNA.

OR

Experience may substitute for the required education on a year for year basis as follows: graduation from high school or equivalent and eight years working in computer-related areas; four years of the computer experience must be directly with Cisco firewalls.

Preferred Experience:

Demonstrated ability to handle large and highly complex work assignments in a timely fashion.

Working knowledge of security protocols, IT systems, security measures and best practices.
